

INSTRUCTIONS

This project consists of server and mobile app. Server has to be first set up to run this project. The server source code is present at the directory “/Source Code/Server code” and the corresponding binary at “/executables/Server”

SERVER DEPLOYMENT

Server is already deployed on Open Shift cloud platform at <http://student-cut.rhcloud.com/home>

Username : gaurav

Password: ankit

So if you want, you can skip the server deployment and continue with mobile app deployment.

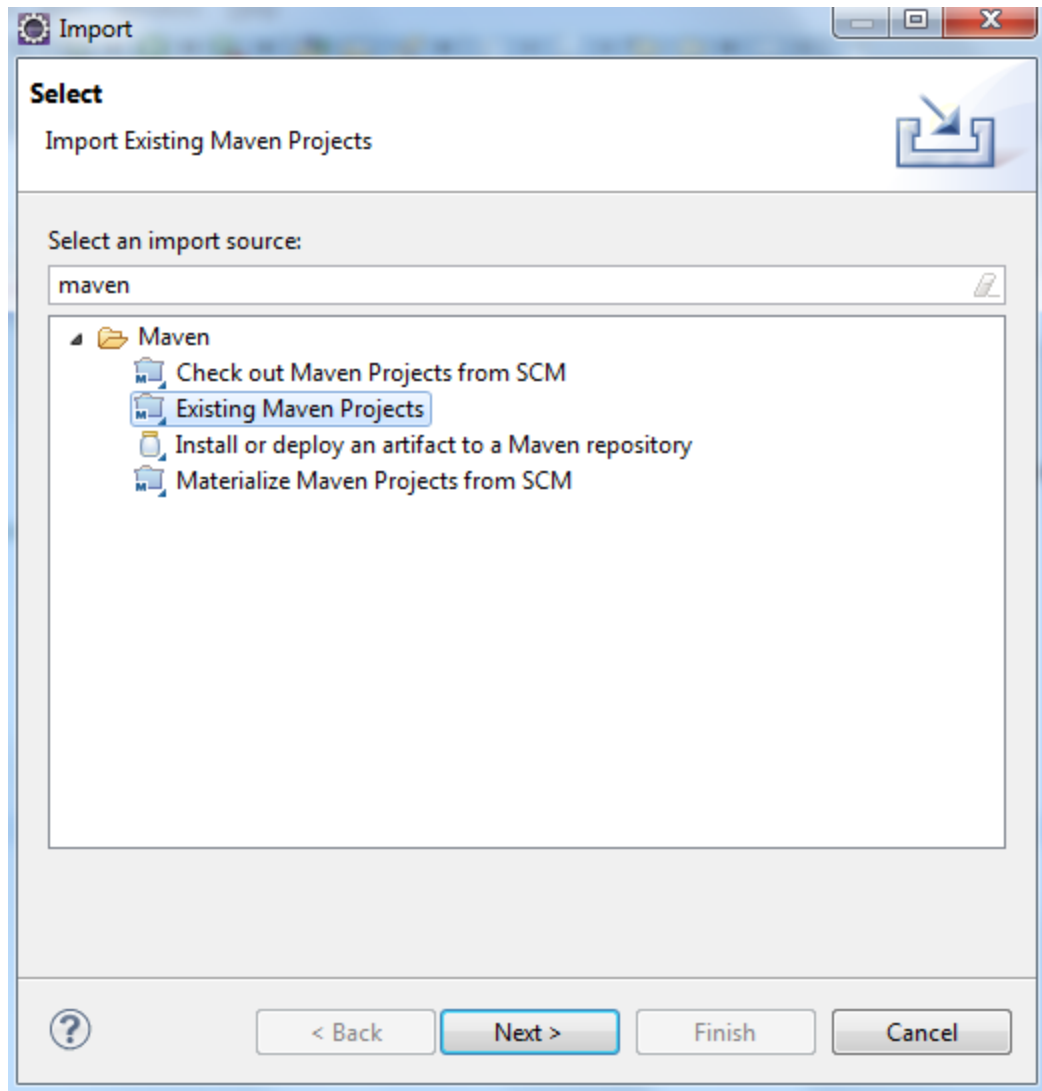

There are 2 ways of deploying server

- 1) Importing MAVEN Project on eclipse
- 2) Importing Eclipse project

1.) MAVEN PROJECT

For this,

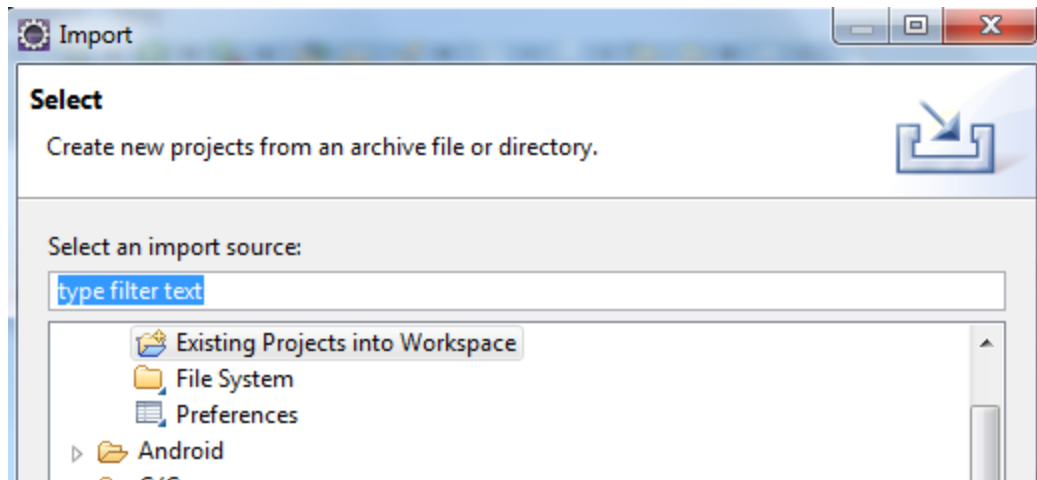

- Your computer must have maven installed and class paths set.
- M2E plugin should be installed in eclipse.
After that in eclipse, Click File → import →existing maven projects,

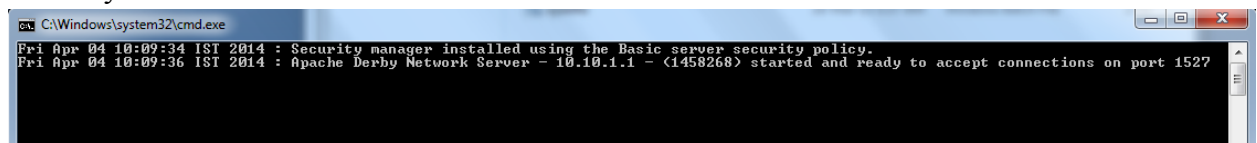

Then browse for “/Source Code/Server code/Maven Based”

OR if you do not want to do it with maven, then click on file→import→existing projects into workspace

Then browse for “/Source Code/Server code/Dynamic Web Project”

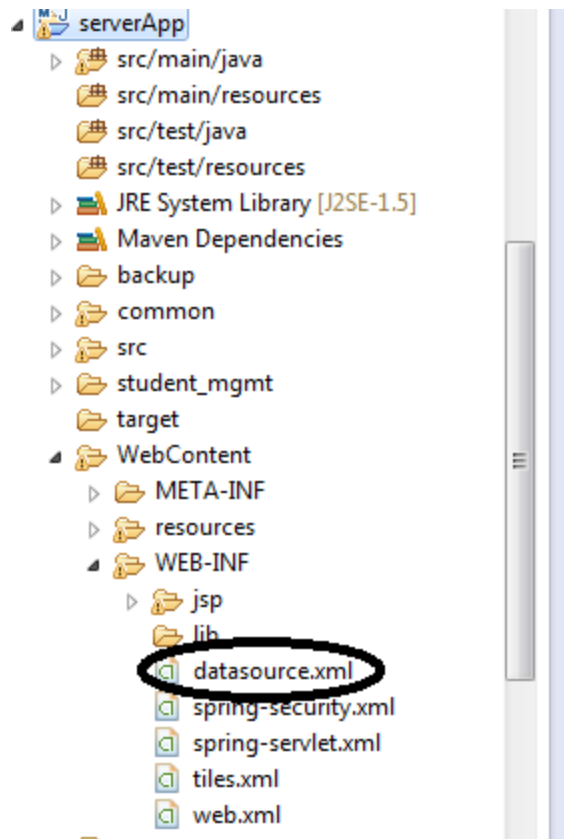

After the project gets imported, start the apache derby DBMS by running **startnetworkserver.bat** inside the bin directory which is inside derby installation directory.

Note the port number (in this case it is 1527). It will be used to enter inside **datasource.xml**.

Minimize the command prompt

After apache derby have started, **edit datasource.xml**

Edit two lines in the xml,

The first line inside `<property name="url">` is for the database url which should be set to `"/Database/apache derby database/student_mgmt"`

****Remember these are forward slashes even for windows OS****

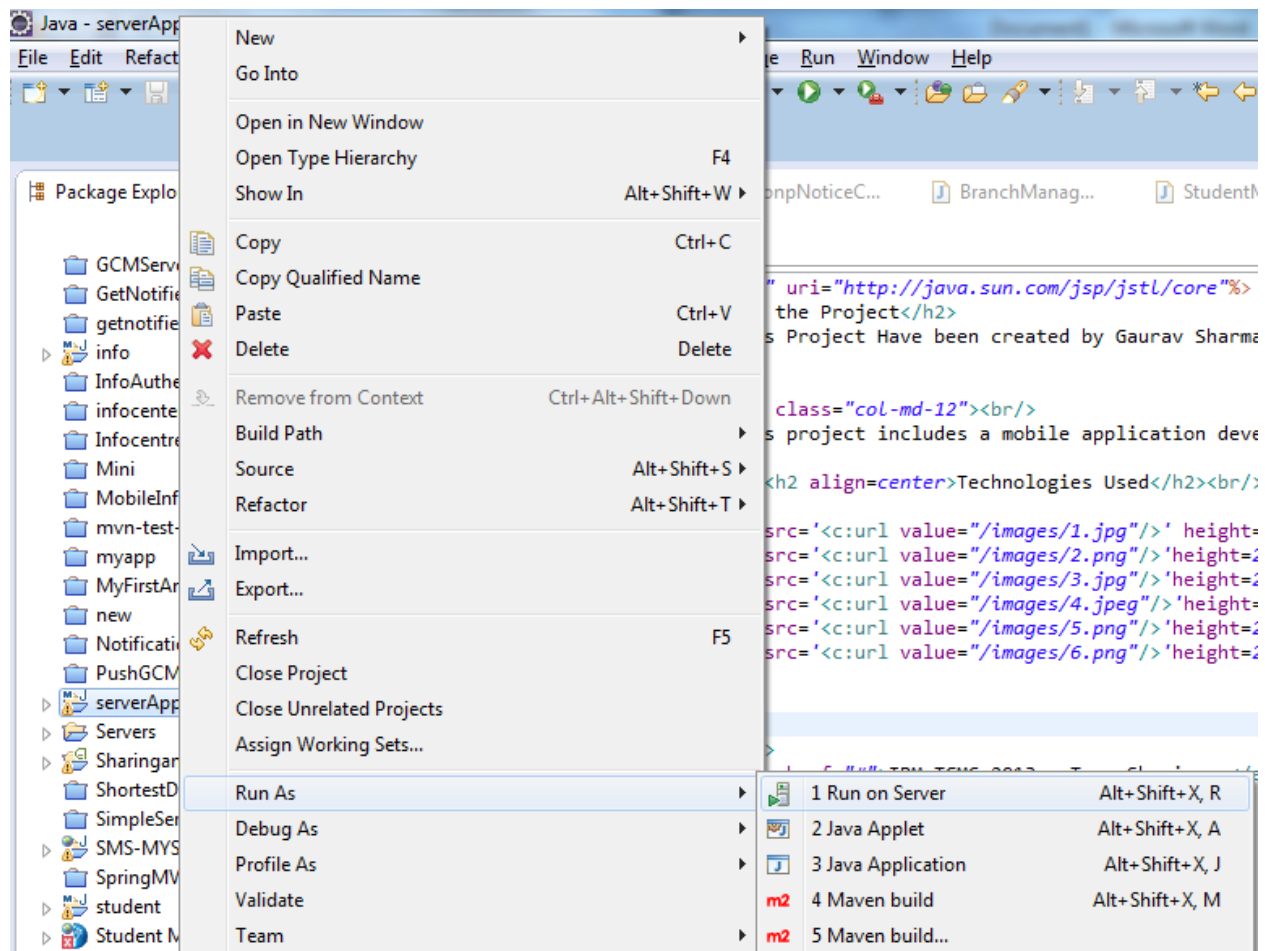

```
<context:annotation-config />
<bean id="dataSource"
    class="org.springframework.jdbc.datasource.DriverManagerDataSource">
    <property name="driverClassName" value="org.apache.derby.jdbc.ClientDriver" />
    <property name="url"
        value="jdbc:derby://localhost:1527/C:/Users/Devesh/workspace/serverApp/student_mgmt" />
</bean>

<bean id="fileSaveUrl" class="java.lang.String">
    <constructor-arg>
        <value>C:/Users/Devesh/Desktop/</value>
    </constructor-arg>
</bean>
```

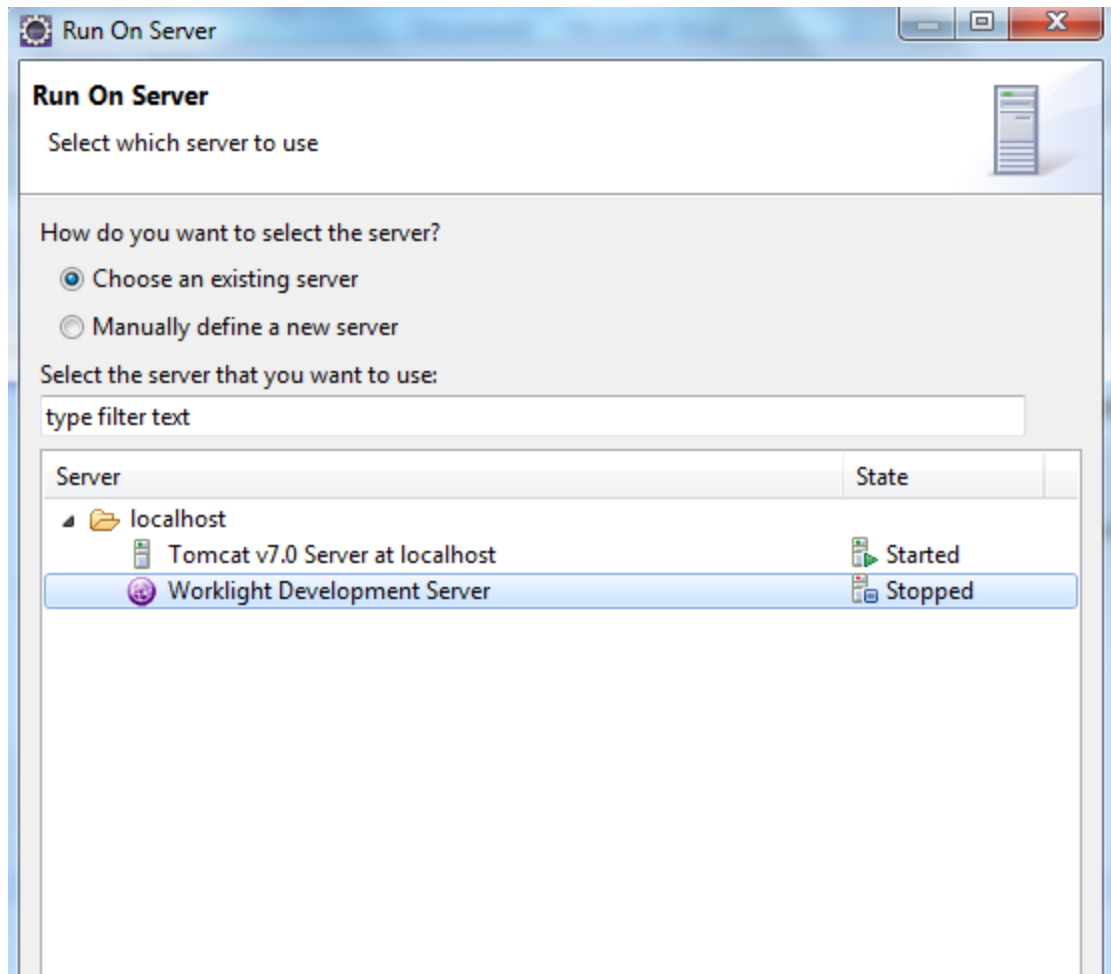

The second path is for the path where file uploaded by the teacher will be saved

Note :: Remember to add ' / ' after selecting the directory.

After the project gets loaded, right click it → run on server

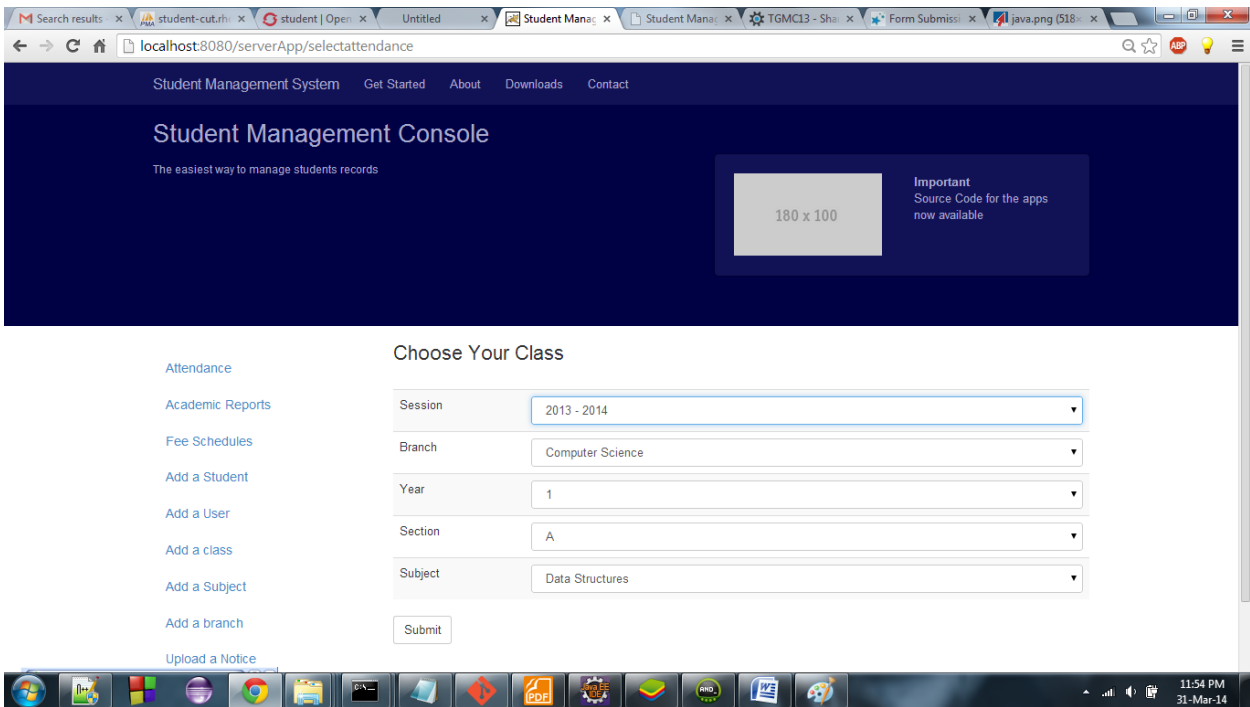

Then select Worklight server

The server is Done, Check by running it in browser.

Username: gaurav

Password: ankit

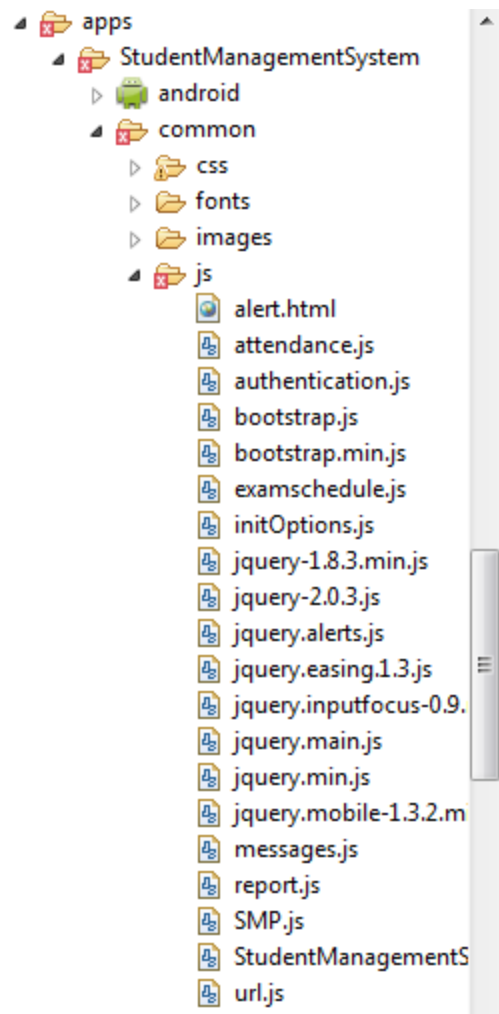

SETTING UP MOBILE APPLICATION

Import the project in eclipse

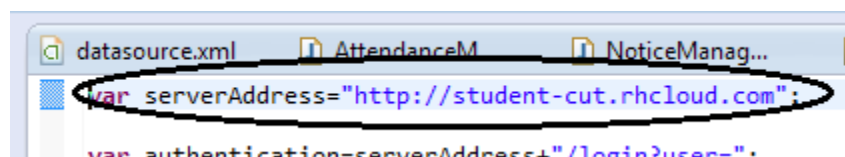

If you are using the existing cloud server on open shift (URL mentioned above), then there is no need to modify url.js, just execute the apk or compile using the source.

Otherwise if you are running the server on your own,

Go inside apps → StudentManagementSystem → common → js → url.js

Edit the first line to your server address(ex – **192.168.1.1:8080/serverApp**)

****Do not put forward slash after server address ' / ' ****

****Do not put localhost or 127.0.0.1 address****

Compile for android and run

Username for mobile App – 1109113049

Password -- 1109113019

**** By default username of any new created user(student) will be rollno and password too will be roll no.****

How To Use

Go to the server address or if you are using our cloud, then go to <http://student-cut.rhcloud.com/home> .

LOGIN

login with **username gaurav** and **password ankit**.

This was **admin login**.

Adding a new Branch/Course

In the beginning, there will not be all the braches/courses in the database, to add them click at **add a branch** link at the left sidebar.

Enter new Branch detail

Branch Name	<input type="text" value="Computer Science"/>
Branch code	<input type="text" value="cse"/>
<input type="button" value="Submit"/>	

Adding a new Subject

The database do not have list of available subject. To add subjects, click at **Add subject** in the left sidebar.

Enter new Subject Detail

Subject Name	Data Structures
Subject code	ECS-501

Submit

Whenever a new subject is introduced in the curriculum, an new subject have to be added.

Adding a new Student

Since the database will have no student records, it can be added by clicking at **Add a student** link at left sidebar.

Enter new student detail

Name	Gaurav Sharma
Roll no	1109113043
Father's name	Ashok Sharma
Mother's name	Kaushalya Sharma
Email Id	guarav2493@gmail.com
Parent's Email Id	kausha2564@gmail.com
Branch	Computer Science
Section	A
Year	3

Submit

The **username** and **password** for a new student will be the **roll number** itself

Roll number should be integer example **1109113019**.

Adding a new Class

Adding a new class is just like creating a **new attendance register**.

Like creating a new attendance register, this process have to be done every year for every new class.

Enter new Class Detail	
Branch	Computer Science ▼
Section	A ▼
Year	1 ▼
Session	2013 - 2014 ▼
Number of subjects	3
No of students	4

Enter new Student's roll numbers		
Student - 1	1109113043	✓
Student - 2	1109113045	✓
Student - 3	12	✗
Student - 4	1109113046	✓

The roll numbers which were not added in **Add a Student** section will no be recognized. And will give a cross icon ✗. The correct roll numbers will give a Tick sign ✓

Attendance

Teachers can take attendance of their classes by selecting their class after clicking at **Attendance** link at left sidebar.

Choose Your Class

Session	2013 - 2014 ▼
Branch	Information Technology ▼
Year	3 ▼
Section	A ▼
Subject	Software Testing ▼

Now you can check on name of students who are present

Roll number	Name	Count	Total	Present
1109113016	Amogh Gupta	2	4	<input type="checkbox"/>
1109113019	Ankit Chaurasia	4	4	<input type="checkbox"/>
1109113029	Archana Rai	2	4	<input type="checkbox"/>
1109113033	Atul Kushwaha	3	4	<input type="checkbox"/>

Click submit and its done.

Marks Upload

To upload examination reports/marks, click on **Academic Reports** on left sidebar. Click on the type of exam you want, if it does not exist, click on **Add new exam** to create a new exam type.

Sessional -1

Class Test

Add New Exam

After selecting the exam type you will have option to upload or view marks, Click at upload, choose your class that you had already created earlier

Choose Your Class

Session	2013 - 2014 ▼
Branch	Information Technology ▼
Year	3 ▼
Section	A ▼
Subject	Computer Organization ▼
Total Marks	100

Submit

Start entering marks

Roll number	Name	Marks
1109113016	Amogh Gupta	<input type="text"/>
1109113019	Ankit Chaurasia	<input type="text"/>
1109113029	Archana Rai	<input type="text"/>
1109113033	Atul Kushwaha	<input type="text"/>

Submit

Creating a new Account for Teacher/Admin

If you want to add a new Administrator or a new Teacher, Click on **Add a user** on left sidebar.

Add a new user

Username	<input type="text" value="1109113019"/>
Password	<input type="password" value="....."/>
Authority	<div>Admin ▼ Admin Teacher</div>
<p>Submit</p>	

Any teacher / admin can upload a notice for entire college. For that, just click at **Upload a notice** on left sidebar.

Uploading Notices/Assignments

Upload Notice

Enter subject

File Edit View Format

No file chosen

Add more files to upload

Upload Notice

With a notice, **multiple files** can also be **attached** for example assignments.

The uploaded notices can be seen on **View Notices** on left sidebar.

Notices

Subject	Date	Author
New Notice for all students 	2014-04-01	gaurav
Preparatory Leave	2014-03-31	ankit
Assignment 2 - DBMS	2014-03-31	ankit
New Notice for Testing	2014-03-31	gaurav

Attachment

« 1 2 3 4 »

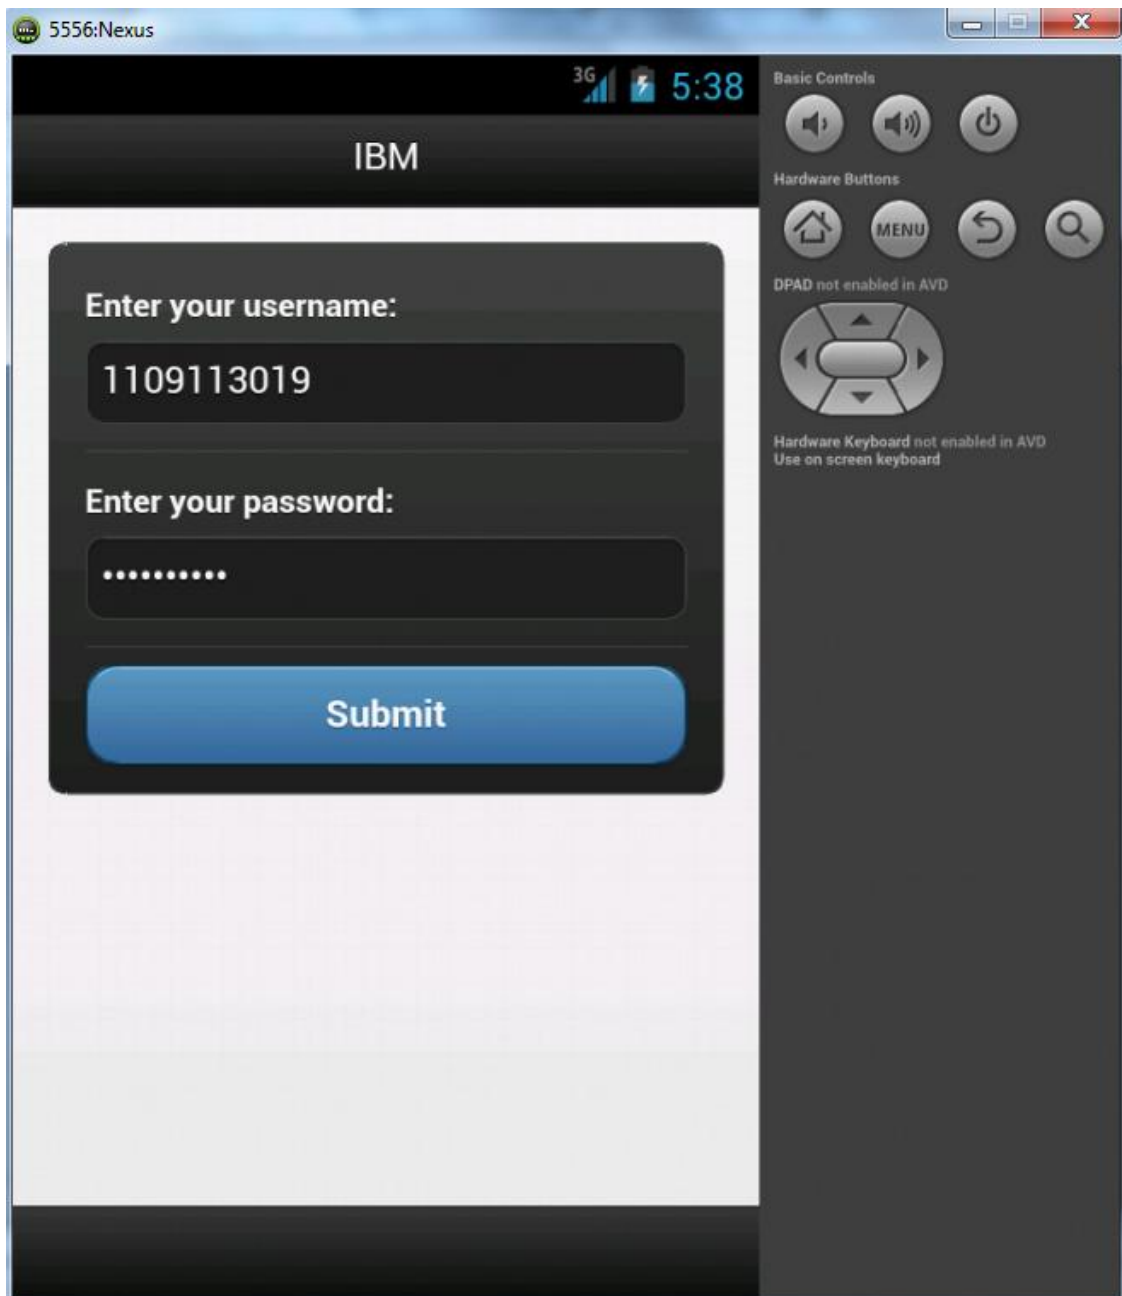

Notices with attachment will have a paperclip symbol ahead of their subject.

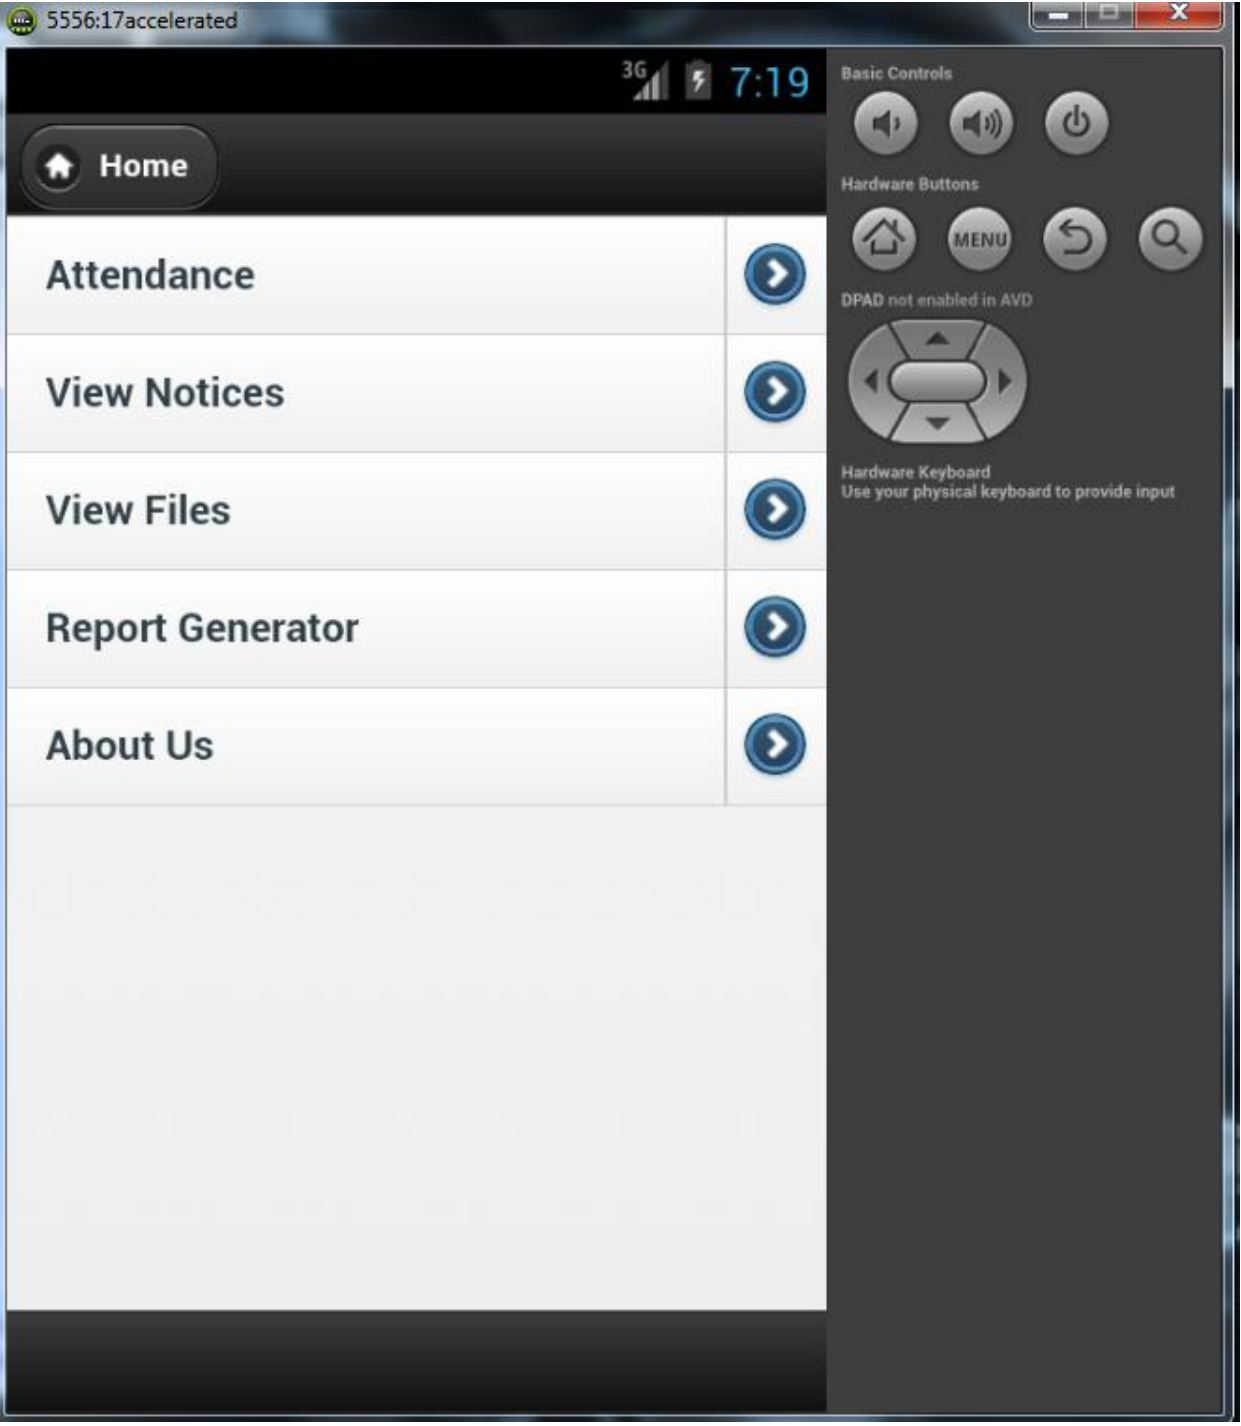

Using Mobile App

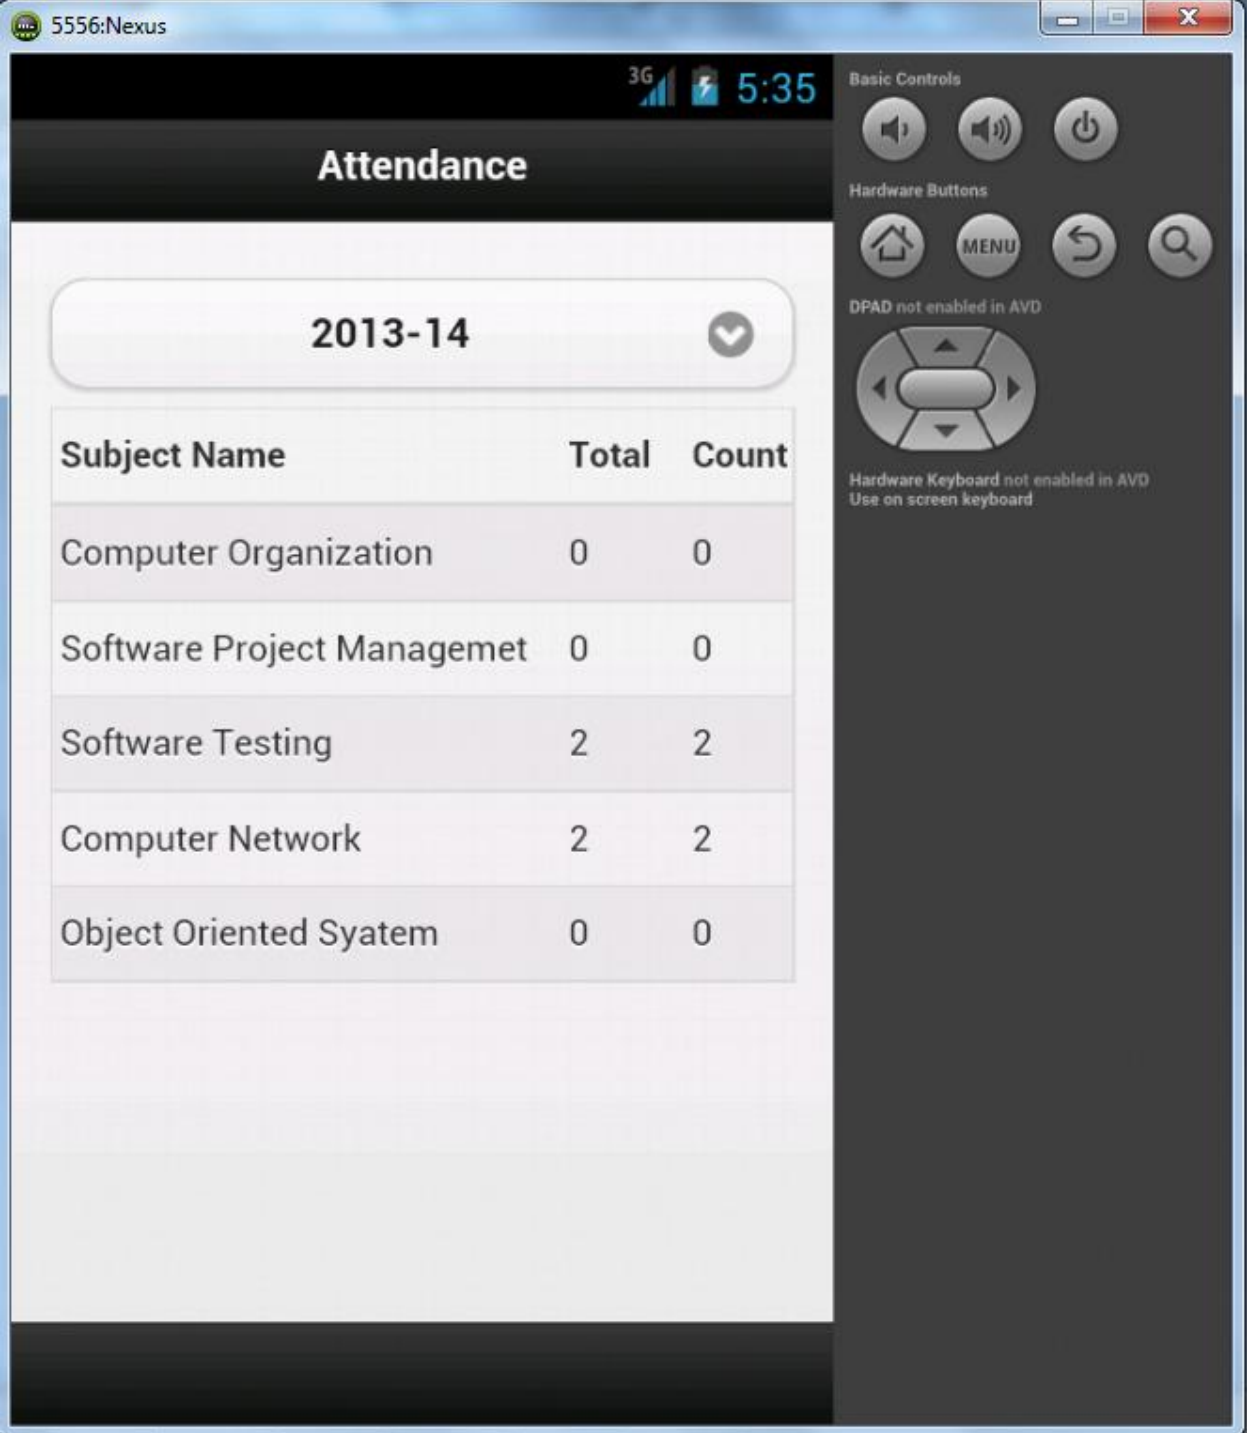

To view all things (attendance, notices, marks), students have to log into their phones, using the mobile app, Enter their username and passwords, and begin.

Username 1109113019

Password 1109113019

About Us

This application have been developed by Gaurav Sharma and Ankit Chaurasia of team Sharingan for TGMC 2013 We are Engineering students in 3rd Year from JSS Academy Of Technical Education, Noida. We like to learn new technical things and program wherever we can, we mostly program in java,android,Windows phone and web applications. We have made some projects together which includes

College portal with a forum, book recommendation section and a book bidding section for second hand books

JSS Infocentre Mobile App that pushes all notifications about assignments, exams etc to student's cell phones in Windows 8 and Android platform

Student Management System for IBM TGMC 2013

We also have a blog where we write some of
